DETAILED ACTION

1. The Examiner has carefully considered Applicant's amendments and remarks filed on 8/8/2003. Applicant's amendments to the specification and claim 1 have all been entered.
2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
3. Rejections not maintained are withdrawn.

Response to Amendment

4. Claims 1-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Worden et al. (US 4443511), substantially for the reasons set forth in section 3 of Paper No. 7, together with the following additional observations.

It is noted that the Specification and claim 1 have been amended to recited in part "the contours of the nodes and fibrils of said porous hydrophobic film matrix are visible through said hydrophilic resin coating layer ...".

With respect to Applicant's Response arguing that "The direct comparison in *the* Figures of the PTFE matrix before and after coating clearly indicates that the contours refers to the contours of the matrix, not to the general outlines of the surface" (Remarks, page 6, top paragraph), the Examiner repeats (see Paper No. 7, page 2) that Figs. 2(b) and 4(a)-(c) of Worden clearly show the general outline of the surface of a porous hydrophobic film with a thin coating of hydrophilic resin, i.e., the contours of the surface

Art Unit: 1771

of the porous PTFE film is clearly visible through said hydrophilic resin coating layer over at least a portion of said hydrophilic resin coating layer; further, the surface is clearly not featureless, i.e., the amount of coating is not sufficiently thick to mask the contours, Applicant's argument to the contrary notwithstanding. Furthermore, in Fig. 5(c), Worden shows a detailed SEM of a stretched coated sample at 7000x with clearly visible contours of the nodes and fibrils, Applicant's argument to the contrary notwithstanding.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Victor S Chang whose telephone number is 703-605-4296. The examiner can normally be reached on 8:30 - 5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Terrel H Morris can be reached on 703-308-2414. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0661.
